

Part 2

Making Pairs of the Squares Cut in Part 2:

You'll take squares of fabric in pairs and match them with two right sides together. See diagrams below for sewing and cutting to make half square triangles. Each pair of squares makes two half square triangle blocks.

Take 14 squares of B Fabric and 14 squares of C fabric and pair them. (You'll use the 4.5" squares)

Take 18 squares each of A Fabric and 18 squares of B fabric and pair them. (You'll use 4.5" squares)

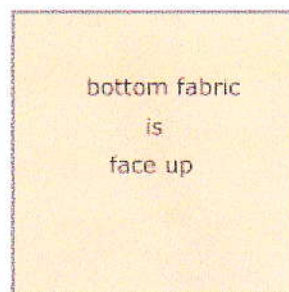

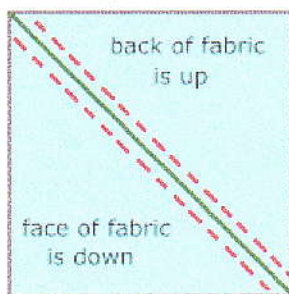

If you are using several different fabrics for A, B or C - mix them when you pair them to create different half square triangles.

How to Sew & Cut the Half Square Triangles:

The squares go right sides together. The back of the lighter color square is uppermost. Using a ruler and a fine felt pen or a sharp pencil mark a line from one corner to the other diagonal corner as shown in green below. Don't worry about what kind of pen or pencil, this line won't show.

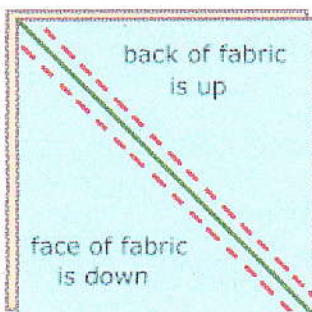

Sew with a quarter inch seam on each side of the drawn line using a 1/4" quilting foot. Now you will cut along the green line using either a rotary cutter or scissors.

Top lighter fabric

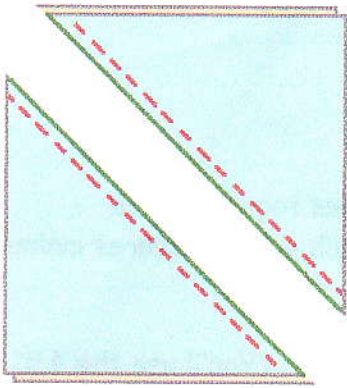

— Green line = cutting
- - - red dash = sew

Top lighter fabric

— Green line = cutting
- - - red dash = sew
seam is 1/4"
between red and green lines

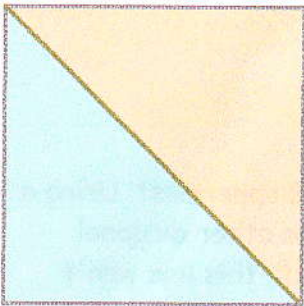

You will now have two pieces as shown below. Press these all open to form the half square triangles.

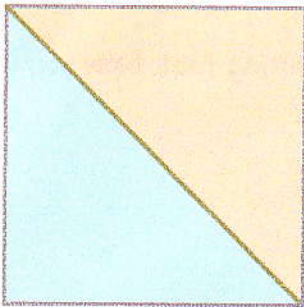

Making Pairs of the Squares (see Part 2)

When you press them open you can trim off the little rabbit ear corners.

press 2 open
trim corners off
